

**GOVERNMENT OF INDIA  
MINISTRY OF TEXTILES  
OFFICE OF THE TEXTILE COMMISSIONER  
POST BAG NO. 11500, MUMBAI – 400 020  
Fax : 022-22002495, E-mail : [texcomindia@txcindia.com](mailto:texcomindia@txcindia.com)**

No. 28(19)/2003-MS/

Date : 23<sup>rd</sup> Jan., 2004

**Circular No. 7  
(2003-2004 Series)**

**Sub : Technology Upgradation Fund Scheme (TUFS).**

**Credit Linked Capital Subsidy @ 20% under TUFS (CLCS@20%-TUFS ) for  
Powerloom sector – Operational Guidelines .**

1. The government has provided an option to the powerloom units to avail of 20% capital subsidy under TUFS in lieu of 5% interest reimbursement. The operational guidelines of the CLCS@20%-TUFS are as follows:

***Duration of the scheme***

2. CLCS@20%-TUFS will be in operation from 6<sup>th</sup> November, 2003 to 31<sup>st</sup> March, 2007. The loan sanctioned by the lending agencies till the last date of duration of the scheme will be eligible for availing of 20% capital subsidy.

***Eligible units***

3. The scheme is applicable to powerlooms in SSI sector only i.e., the units having investment in plant & machinery upto SSI limit. However, SSI registration is not a pre-requisite for availing of assistance under the scheme.

***Quantum of subsidy***

4. 20% capital subsidy will be available on investment in TUF compatible specified machinery subject to a ceiling of Rs.12 lakh on subsidy amount.
5. Powerloom units availing of 20% subsidy would not be eligible under the NEF scheme.

***Eligible machinery and fixation of price***

6. The eligible machinery under the scheme include indigenously manufactured semi-automatic looms, automatic looms, shuttleless looms

with or without specified loom accessories and specified weaving preparatory machinery.

7. The new imported looms as well as 2nd hand imported shuttle-less looms as per TUFs norms will also be eligible under the scheme.
8. The first list of identified manufacturers along with benchmark machinery and benchmark price is fixed by the Textile commissioner as per guidelines issued by the government (**Annex-I**) is placed at **Annex-II.** The 20% capital subsidy would be available on the price of such indigenous machinery included in the list, or actual invoice price, whichever is lower.
9. Subsidy limits on second hand imported looms for different models and vintage will be issued separately by the Textile Commissioner..

#### ***Review of price of machines***

10. Initial price will be maintained for one year, thereafter it will be revised on the basis of the price revision formula, which will be worked out based on the major constituents of elements of cost. The price revision formula will be worked out and announced separately by Textile Commissioner.

#### ***Lending Agency***

11. NBFCs registered with RBIs as category A and B, all banks including co-operative banks / SFCs /SIDCs and SIDBI are eligible for funding under the scheme.

#### ***Financial norms***

12. Financial norms like period of loan, moratorium period, security debt-equity ratio, previous years profit position, networth etc. will be as per existing norms of lending agency. However, they should not be stricter than TUF norms.
13. In addition to term loan eligible powerloom units can also avail of financial assistance under lease financing and hire- purchase schemes of the lending agencies.

#### ***Release of subsidy to the machinery manufacturers***

14. The powerloom unit will approach the lending agency for a term loan with their project proposal. The lending agency would advise the office of the

Textile Commissioner of the sanction of the loan in the prescribed format as at **Annex-III**.

15. The powerloom entrepreneur would release his initial advance of 15% contribution directly to the machinery manufacturer. The lending agency would release the loan to the machinery manufacturer when machinery are ready for dispatch. In case, with the loan amount, 80% of the cost of the machinery is not met, the powerloom weaver would make good the remaining amount to the machinery manufacturer from his own resources.
16. The machinery manufacturer/powerloom entrepreneur would install and commission the loom on receiving 80% of the cost of the machinery. After satisfactory commissioning of the loom, the machinery manufacturer would inform the office of the Textile Commissioner.
17. In case of imported machinery, the powerloom weaver would inform the office of the Textile Commissioner after commissioning of the looms.
18. Textile Commissioner would constitute inspection teams on regional basis to inspect and certify the commissioning of the machinery. It would be ensured that Certification Committee issues a certificate within 15 days from date of intimation by the machinery manufacturer.
19. The 20% subsidy would be released by the office of the Textile Commissioner to the machinery manufacturers after issue of certification from the inspection team. The office of the Textile Commissioner would ensure that 20% subsidy is released within 15 days of issue of the certificate by the Certification Committee.
20. In respect of TUFs compatible imported looms and machinery, the powerloom weavers will need to open a LC in Bank to make the purchase. In such cases, the 20% subsidy would be released directly to the powerloom weaver's bank account after receiving installation and commissioning report of the imported looms and machinery.
21. In case powerloom entrepreneur avails of bridge finance from the lending agency for the 20% capital subsidy to be given, the 20% subsidy would be released by the Textile Commissioner directly to the lending agency.
22. In case machinery is being installed/commissioned in phases, the subsidy shall also be released in phases.

23. Textile Commissioner would also constitute a team comprising of senior officers of the Head office to periodically inspect on random basis, the machinery installed /commissioned.

***Safeguard against mis-utilisation***

24. To prevent mis-utilisation of the scheme, casting of a unique mill no. and engraving (of not < 2 mm depth) of the running serial number would be done on each machine. There would be a nine digit identification code for each machinery. The nine digit identification code will include the following:

- The first three digits (000) of the identification code will indicate unique three digit mill No. for each manufacturer which has been allotted by the Textile Commissioner as mentioned in col.3 in **Annex-II**. The unique three digit mill no. will be casted in the specified cast components by the machinery manufacturers.
- The next two digits (00) of the identification code will indicate the type of the machinery. The two digit number for different type of machinery has been specified by the Textile Commissioner. The details of the two digit numbers are given in the **Annex-IV**. The two digit number is to be engraved (of not < 2 mm depth) besides three digit unique mill number on each machinery.
- The next four digits (0000) will indicate number of machinery of that manufacturer produced under the scheme. The four digit running serial No. for each type of machinery will be given by the respective machinery manufacturer and is to be engraved (of not < 2 mm depth) besides three digit unique mill number and two digit number specified by the Textile Commissioner for that machinery.

For example the nine digit identification code for first semi-automatic loom produced under the scheme by M/s Honest Trading Co. Pvt. Ltd., would be **'017010001'**. The first three digits '017' indicate the unique mill number of M/s Honest Trading Pvt. Ltd.; the next two digit '01' indicate the type of machinery i.e., semi-automatic loom; the next four digit '0001' indicate the first semi-automatic loom produced by M/s Honest Trading Company under the Scheme. Likewise the nine digit identification code for 1<sup>st</sup> rapier loom produced under the scheme by M/s Lakshmi Textile Stores would be **'001040001'**. The first three digits '001' indicate

the unique mill number of M/s Lakshmi Textile Stores; the next two digit '04' indicate the type of machinery i.e., rapier loom; the next four digit '0001' indicate the first rapier loom produced by M/s Lakshmi Textile Stores under the Scheme.

25. The identified machinery manufactures would cast the 3 digit unique mill No. on the select cast components as specified by the Textile Commissioner. The item-wise specified components for casting are at **Annex-V**. The two digit machinery No. specified by the Textile Commissioner and the four digit running S.No. would be engraved (of not < 2 mm depth) on the machine on such cast components, besides the mill No.
26. For specified machinery which have no cast components engraving (of not < 2 mm depth) of unique mill no. instead of casting of such no. is permitted by the Textile Commissioner.
27. For the existing stock of the machinery manufacturers, the stock declaration statement as on date of launch of the scheme would be submitted by the machinery manufacturers to Shri S.Chakravarthy, Director, Powerlooms. Based on the quantum of such stock, the Textile Commissioner would take a decision regarding coverage of such stock under scheme by permitting engraving (of 2 mm depth) of the unique mill nos. on such stock.

***Monitoring of the progress of the scheme***

28. The TAMC will monitor the progress of the scheme.

***Grievance Committee***

29. Grievance of the weavers after purchase of machinery under the scheme would be considered by a grievance committee under the chairmanship of the Textile Commissioner comprising of one representative each of Weavers Association and FITEI.

The operational guidelines of CLCS-TUFS@20% may please be brought to the notice of all concerned.

(Smt. Shashi Singh)

Director

(Smt Shashi Singh)  
Director

**Guidelines issued by the government for price fixation of  
of eligible machinery under CLCS @20%TUFS**

1. To ensure consistency in quality of machinery indigenous manufacturers will be identified and machinery of such manufacturers will be benchmarked in terms of specifications and performance parameters.
2. Textile Commissioner will fix the sale price of the eligible machinery under the Scheme. Prices will be fixed machinery wise, specification wise on the basis of the item-wise invoice price for the past period. The past period would be considered as period from January 2003 to March 2003 and if there are no invoices for that period, the period may be decided by the Textile Commissioner. Wherever there are no invoices at all, price can be fixed based on the invoice price of another manufacturer of equivalent, or, slightly inferior machinery.
3. Textile Commissioner could fix the bench mark price different than the invoice price with a view to rationalise prices among different models of the same manufacturers.
4. In case identified manufacturers bring in the market new / improved models of the eligible machinery during the course of the scheme the price of such models will be fixed at par with the equivalent models of the other identified manufacturers.
5. In case identified manufacturers bring into the market a completely new model which is not available indigenously, the Textile Commissioner will decide on the price of such models.
6. To prevent over invoicing in respect of imported 2nd hand looms, a cap on subsidy based on market study of prices of 2nd hand looms will be specified by the Textile Commissioner.
7. A list of benchmarked machinery with prices giving details of manufacturer-wise, machinery wise, specification-wise price will be issued by the Textile Commissioner.

**Note:** (1) In case second hand loom has been imported it should be mentioned in Col..(3)

(2) In Col.(6) bench mark price or invoice price whichever is lower should be mentioned.

(3) Total amount sanctioned under CLCS @ 20% should be based on benchmark price or invoice price whichever is lower.

**Two Digit code for different type of machinery specified  
by Textile Commissioner.**

<b>S.No.</b>	<b>Type of Machinery</b>	<b>2 digit code specified by Tx.C</b>
1.	Semi-Automatic loom	01
2.	Automatic shuttle stop change loom	02
3.	Pirn changing automatic loom	03
4.	Shuttle-less Rapier loom	04
5.	Dobby	05
6.	Jacquard	06
7.	Pirn winding	07
8.	Sectional warping machine	08
9.	Warping machine	09
10.	Sizing machine	10
11.	Two for one twister	11
12.	Prewinder/rewinder	12

**ITEM-WISE SPECIFIED CAST COMPONENTS**

Looms	Sectional Warping
▪ Machine Frame –R	▪ Brake Flange for Warping Drum (RH)
▪ Machine Frame –L	▪ Brake Flange for Warping Drum (LH)
▪ Sley Sword - L	▪ Reed Table Body
▪ Sley Sword - R	▪ Beam Donning Doffing Set
▪ Dobby Mounting Frame/ Top Mounting Frame-L	▪ Gear Box for Traversing the Machine
▪ Dobby Mounting Frame/ Top Mounting Frame-R	▪ Gear Box for Warping Table & Beam
▪ Breast Beam	▪ Arm Traverse
▪ Loom Centre Bracket	
▪ Box Plate – L	
▪ Box Plate – R	

Warping Machine	Sizing Machine
<b>Creel Part</b>	<b>Creel</b>
▪ Frame Holders	▪ Creel Bracket
▪ Yarn Tensioners	▪ Creel Frame
▪ Cone Frame	<b>Size Box</b>
<b>Head Stock</b>	▪ Rubber Roller Housing
▪ Drive Shaft Housing	▪ Main frame
▪ Girt Bars	<b>Dryer</b>
	▪ Cylinder Bearing Housing
	▪ Cylinder Dish End
	<b>Head Stock</b>
	▪ Nip Roller Housing
	▪ Main Frame

<b>Prin winding machine</b>	<b>TFOT / Pre-winder</b>
▪ Gear Box	▪ Gear Box / Motor Housing Plate
▪ Fabricated important part (At least in four places)	▪ Each Section's binders

**Note:** In case of the castings, the unique manufacturers code No. should be inserted during the casting of the components. The running serial No. should be engraved on the components besides the code No.
