various Technical Textiles. Accordingly it was decided to modify machine name in the circular as "Cable Corder for various Industrial Uses" instead of "Cable Corder for Tyre Cords"

Agenda No. 4. Request from the Federation of Indian Art Silk Weaving Industry.

The Federation of Indian Art Silk Weaving Industry have requested to modify the ATUFS guidelines as "Air Compressor 15 H.P. and above with inbuilt invertors and with or without air dryers" instead of "Air Compressor 15 H.P. and above with inbuilt invertors and air dryers". The federation has pointed out that external dryer increases the efficiency of the air compressor and reduce dew point which is water content in air for air dryer. With internal dryer there are chances of water formation in air. Further they have pointed out another drawback in case of internal air dryer that in case the air dryer is damaged than the whole air compressor needs to be put on hold, while external air dyer allows freedom to change only air dryer if there is any problem.

Decision Taken: The committee recommended that the ATUFs guidelines may be modified as under "Air Compressor 15 H.P. and above with or without air dryers"
